PRESENT

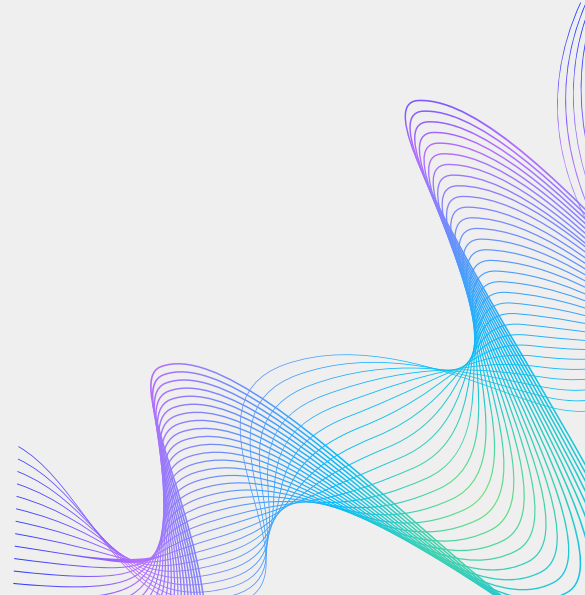

SINGING
WITH
VOCAL
DISTORTIONS

A WORKSHOP IN NUERMBERG

Sept 26 & 27, 2026

WITH MAURO FIUZA

IN ENGLISH

THE LECTURER

MAURO FIUZA

Mauro is a Brazilian *voice researcher* and *vocal teacher* with *international* teaching experience.

He combines his *scientific expertise* with *practical experience* and teaches in English.

The workshop is designed for anyone who wants not only to hear *rough vocal effects*, but also to *understand* them and *create* them themselves.

SCIENCE MEETS PRACTICE

Some voices are *raspy*, *scratchy*, or *break* – and that’s exactly what makes them *irresistible*.

Melissa Cross, Aretha Franklin, Bruce Dickinson, Beyoncé, Louis Armstrong, and many more – they all deliberately use *rough, distorted sounds* to infuse their voices with *emotion and depth*.

We take a closer look: What happens *physiologically* when a voice sounds like that – and how can you do it *without damaging your voice*?

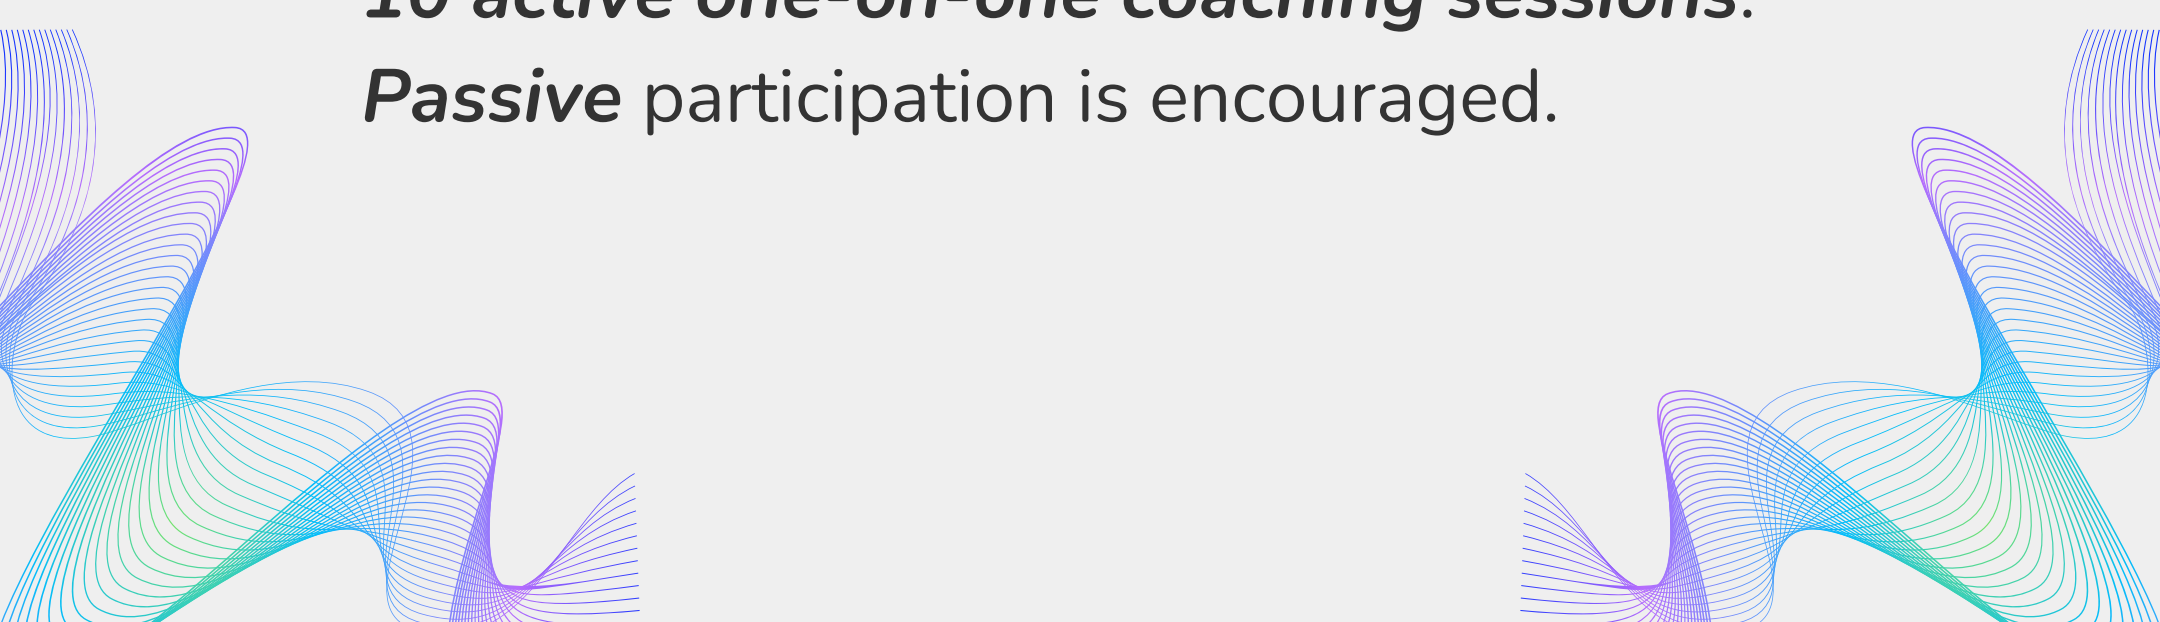

SCHEDULE

On **September 26 & 27, 2026**, we invite you to the **Nuremberg** area for a **two-day workshop** on **rough vocal effects** – from **growling** and **grunting** to **fry scream**.

On **September 26, 2026**, the **introduction** and **basic course** will take place from **10 a.m. to 5 p.m.**

On **September 27, 2026**, the **MASTERCLASS** will take place from **10 a.m. to 2 p.m.**

MASTERCLASS: There will be a **maximum of 10 active one-on-one coaching sessions**. **Passive** participation is encouraged.

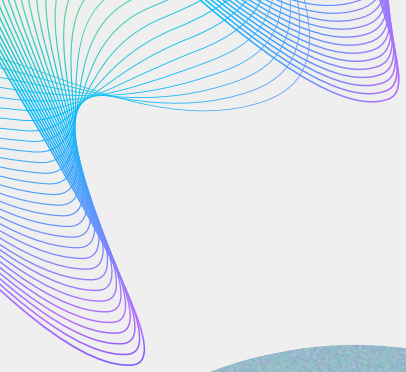

TICKETS

Two-day ticket (*active*
participation in the master
class): **250 €**

Two-day ticket (*passive*
participation in the master
class): **190 €**
